

Shipbuilding

1. Collect materials from around the Amsterdam to use in building your ship!! Use water bottles, napkins, boxes from the shops on board, aluminum cans, casino buckets, etc. Please do not use ship's property (i.e. life jackets, sheets, TVs, cushions, mattresses, etc.). Please do not paint your ship. Feel free to name it and write on it using pen.
2. We like big ships! The bigger, the better!! Dimensions are at the discretion of the team building the vessel, but hopefully your ship will fit in the Jacuzzis.
3. You may NOT float your ship in any form of water before **Sea Trials!**
4. The Sea Trials will take place at the indoor Jacuzzi on Tuesday February 9th. Ships will be judged on appearance, special features, sea worthiness, and cargo carrying capacity (up to 24 cans of soda).
5. No help from the crew of the ms Amsterdam! Be creative and resourceful! This is your creation.
6. **Have fun**, and if you have any questions, please see the cruise staff!
