Only commercially bottled drinking water is permitted to leave the vessel. Exhaust Gas Cleaning Systems

Holland America Line has a long tradition of making environmental sustainability and clean technology a corporate priority. As part of these continuous efforts ms Amsterdam's Diesel Engines are equipped with sea water scrubbers, cutting edge technology which uses the natural chemistry of sea water to remove virtually all sulphur oxide and significantly reduce particulate matter emissions. To ensure maximum efficiency, these systems require a weekly cleaning cycle, this is expected to take place from 10:00 pm Tuesday, February 2, until 5:00 am Wednesday February 3, during which time soot particles may be emitted through the funnels. Out of an abundance in safety precautions during this time, we do not recommend guest's presence outside on Lido-, Sports- and Sky Decks aft.
