Exhaust Gas Cleaning Systems

Land America Line has a long tradition of making environmental sustainability and clean technology a corporate priority. As part of these continuous efforts our Amsterdam's Diesel Engines are equipped with sea water scrubbers, cutting edge technology which uses the natural chemistry of sea water to remove virtually all sulphur oxide and significantly reduce particulate matter emissions. To ensure maximum efficiency, these systems require a cleaning cycle, this is expected to take place this afternoon April 22 and will remain on for the duration of the cruise. During the initial start-up of the cleaning cycle soot particles may be emitted through funnels both on the 22nd and on the 23rd. Out of an abundance in safety precautions during this time, please use cautions while on the aft outside decks.
