The Scotia Sea

The Scotia Sea is a sea that is located in both the Southern Ocean and the South Atlantic Ocean. Normally stormy and cold, the Scotia Sea is the area of water between Tierra del Fuego, South Georgia, the South Sandwich Islands, the South Orkney Islands and the Antarctic Peninsula, and bordered on the west by the Drake Passage. These island groups all sit on top of the Scotia Ridge, which frames the Scotia Sea on the north, east, and south. The Scotia Sea covers an area of about 900,000 sq km (347,500 sq mi). About half of the sea stands above the continental shelf. The islands are rocky and partly covered in ice and snow year round. Named in about 1932 after the *Scotia*, the expedition ship used in these waters by the Scottish National Antarctic Expedition (1902–04) under William S. Bruce. The most famous traverse of this frigid sea was made in 1916 by Sir Ernest Shackleton and five others in the adapted lifeboat *James Caird* when they left Elephant Island and reached South Georgia two weeks later. In Argentina, the Scotia Sea is considered part of an area known as the *Mar Argentino* and several territories claimed but not occupied by Argentina, such as South Georgia and the Falkland Islands, lie within this region.

SEABOURN SPECIAL EVENT

NAVIGATIONAL CHART RAFFLE

You have the opportunity to take home the navigation chart used for this cruise signed by our expedition team and Captain Golubev. You can purchase tickets for this raffle with our Guest Services Specialists inside the Seabourn Square on Deck 7. Proceeds from the \$25 ticket price will be donated to our Crew Welfare fund. We look forward to announcing the lucky winner during the Captain's Farewell Reception.
