

## Full Passenger Emergency Muster Drill

### January 25, 2026 - 10:45am

This notice is to inform all guests that on January 25, at *approximately* 10:30am, we will conduct a Full Passenger Emergency Muster Drill. This aligns in keeping your safety as our top priority and our commitment to provide a secure and enjoyable experience for everyone on board, prior our sailing to Antarctica.

To simulate mustering during emergency, on this date, we ask that you listen carefully to the alarms and announcements. These announcements will guide you to the next step. Please DO NOT make your way to your Muster Station until instructed via PA system.

For this drill, you do not need to bring your life jacket. Muster Station details can be found at the bottom left of your stateroom key card and on the back of your stateroom door. Please bring your stateroom key card for scanning.

Kindly be advised that all onboard services will be temporarily suspended for approximately 1 hour to facilitate this mandatory drill.

Thank you for your full cooperation and we wish you a pleasant continuation of your Grand World Voyage.

Kind regards,  
Volendam Team
